

Making the Move to 7th Grade

Making the transition from elementary to middle school is often difficult for children. This transition is even more difficult for a child with a disability. Middle school is a time when a child becomes an adolescent and he/she faces new challenges, academically and socially. Teachers can help children with disabilities make this transition by promoting the child's feelings of independence while continuing to provide supportive learning strategies.

You are invited to hear some of the ways you can help your child make an easier transition to middle school.

Remember, continuing to provide structure while fostering independence is the ultimate goal.
